AV MOUNTING SOLUTIONS

**FOR A
BETTER VISUAL EXPERIENCE**

WHY CHOOSE ATDEC?

OUR PRODUCTS ARE WORLD CLASS AND IN MOST CASES BEST IN CLASS

Atdec mounts set the standard in terms of their sophisticated design, advanced functionality, clever features, robust construction, ease of installation and long life.

All Atdec products are:

- Designed and developed by our engineering and industrial design team in Sydney, Australia, and are tested to a minimum 10,000 cycles
- Designed to minimize the impact on the environment
- Designed in line with the latest flat panel (LED LCD, OLED and Plasma) technologies on the market

ATDEC PRODUCTS ARE TESTED AND PROVEN

Research and development is ongoing at Atdec including testing lighter and stronger materials with less environmental impact, making installation easier, and enhancing product ergonomics and ease of use features. It is our goal to continue offering exceptional products and solutions, outstanding service and excellent value.

DON'T JUST TAKE IT FROM US, DO AS OUR CLIENTS DO

Our clients include all branches of the US Government and many Fortune 500 companies including McDonalds, Wells Fargo, Boeing and many more. Our mounts can be seen behind flat screens throughout the world, from banks in London (Lloyds) to car dealerships in France (Renault), in airports in Sydney to homes in Seoul, in universities in Canada (Laurentian) to schools in San Francisco.

Tablet Mounts: fixed, portable and secure mounting solutions for a range of modern tablet devices.

TV/Monitor Desk Mounts: ergonomic monitor arms and freestanding desk mounts in a variety of mounting configurations.

TV/Monitor Wall Mounts: fixed, tilt and full motion wall mounts for any size of LED/LCD or plasma TVs.

TV/Monitor Ceiling Mounts: Single and multi-screen mounts for commercial and home use.

Projector Mounts: Ceiling and wall mounting solutions for all types of projectors including short and ultra-short throw.

TV/Floor Mounts: single and dual display mobile TV carts for web conferencing, presentations and digital signage equipment.

Video Wall Mounts: universal, modular and easy to upgrade video wall mounting system. Time and cost saving installation and maintenance features integrated throughout the design.

Cable Management: the perfect accessory to complement any wall mounted display.

COMMERCIAL TABLET MOUNTS

Commercial iPad mounts feature rugged steel components and clever security features to protect tablet devices in the most challenging public environments. Combining strength, security, style and versatility the iPad range is the ultimate mounting solution for commercial applications.

UNIVERSAL VIDEO WALL MOUNT

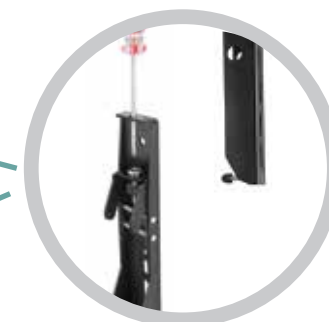

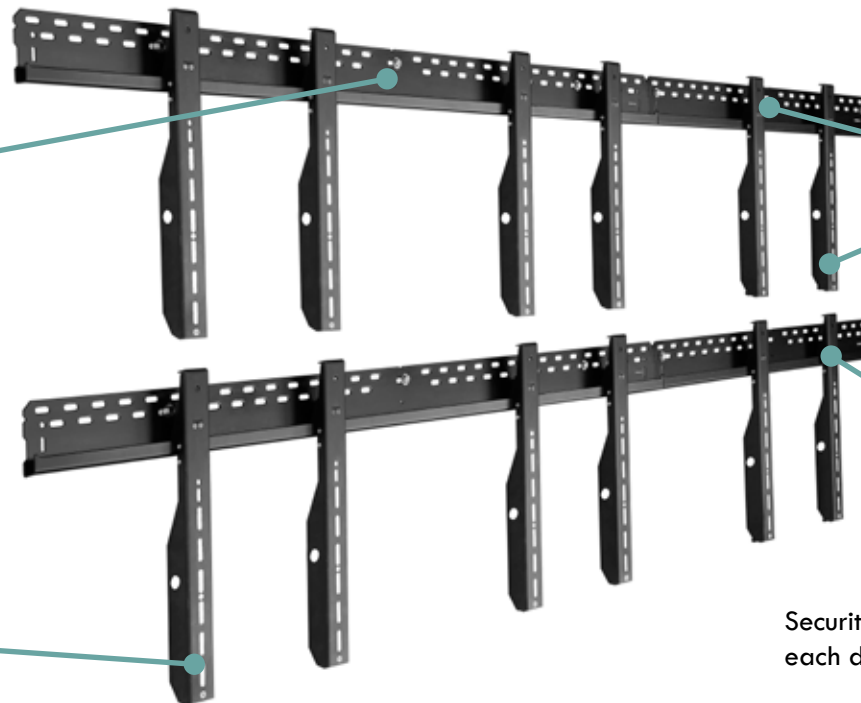

MODULAR | INTERCHANGABLE | UPGRADABLE

Interconnecting wall plates provide alignment assistance to installers

Convenient built in support stand for display maintenance, replacement and cabling

Multiple adjustment points to assist in post installation screen alignment and uneven wall leveling

Security fixing points for each display

Save Installation Time

- Interconnecting plates provide alignment assistance to installers
- Simple, hook-on display installation system
- Multiple points for pre and post installation display adjustments
- Security fixing points for each display

Compatibility

- Maximum weight capacity up to 165 kgs (363 lbs) per display
- Supports unlimited VESA width (and up to 400mm in VESA height)
- Can accommodate media players behind each panel (up to 60mm (2.37") of space available with additional spaces)

Save Installation Cost

- Simple and flexible system relies on a combination of just three parts, one set of vertical supports and two different wall plates
- The wall plates come in two lengths – 100cm (39.6") and 160cm (63.2") which have been uniquely designed to minimise cost and installation time and maximise universal compatibility with video wall configurations using different screen sizes and brands.

Cable management

Ideal for home installations and commercial/office space where advanced cable management is required, the Telehook Cable Manager Channel features a stylish design to reduce visual cable clutter. The Telehook AV equipment Shelves are a perfect addition offering a simple and elegant shelf solution for supporting any type of AV equipment.

Holds up to 10 power and data cables in separate bays (to avoid electromagnetic interference)

Model: TH-AN-CM

Cable management channel

- Durable extruded anodized aluminum
- Low profile, only 28mm (1.10") from wall
- Can be cut to length and painted
- Accommodates up to 4 height adjustable and removable AV equipment shelves

Model: TH-CM-SH-2

AV equipment shelves (2 per pack)

- Durable extruded anodized aluminum
- Supports up to 20kg (44lbs) in weight per shelf
- Can be added and removed easily
- Each shelf is independently height adjustable
- Come in a set of two per pack

SINCE ITS FOUNDATION IN 1998 ATDEC HAS BEEN DEDICATED TO SUSTAINABLE PRODUCT DESIGN AND DEVELOPMENT.

Designed for Disassembly

All Atdec products are designed in order to minimise their impact on the environment. As such, all Atdec products are “Designed for Disassembly” (DFD). DFD means making products that can be taken apart easily for recycling at the end of their life.

Processes are as follows:

- Components which are of adequate quality can be refurbished or reused.
- Metallic parts can be separated easily into categories which increases their recycling value.
- Disassembled plastic parts can be easily removed and recycled, or disposed

Designed for Durability, Strength and Extended use

Atdec is committed to sustainability and through the use of new and innovative technologies we improve the quality, durability, environmental compatibility, and affordability of our products. Our products go through a testing of 10,000 repetitive movements to ensure the mechanisms work as intended even in intensive use environments.

Recycling

Atdec makes full use of recyclable and recycled materials where possible. Aluminium, steel and plastics are the materials of preference for all Atdec products because of their inherent recycling properties in addition to their performance properties. Aluminum in particular has a high value as a scrap metal and is therefore one of the primary metals in all Atdec products. The steel used in our products is relatively easy to separate through magnetic extraction, and it is the world’s most commonly recycled material. For our packaging we use recyclable paper made of recycled materials wherever possible.
