

Portable 7ft Telescopic Ramp - MR-PD7F

The 7ft Aluminium Telescopic Ramp comes in pairs and are designed to be portable and lightweight with an anti-slip surface. For storage, they are very compact, and can be set up easily by extending the length.

Features

- Portable and lightweight
- Great for multiple steps
- Space-saving; retracts in 2 sections
- Anti-slip surface

Specifications

- Comes in a pair
- Length (full extended): 7ft (84")
- Length (retracted): 49" (125cm)
- Internal Width: 10" (25cm)
- Overall Width: 12" (30cm)
- Weight: 8kg/ramp, 16kg per pair
- Capacity: 150 kg/ramp

Note:

As a general rule, we recommend a gradient no steeper than 1:6 for assisted use. E.g. if the height of your steps is 12" the recommended length of ramp will be $12" \times 6 = 72"$ (6 ft ramp). For 3-step HDB flat entrances which do not face the common corridor, we recommend a 6ft ramp or our telescopic ramps.
